Duroplast Submersible Pump

Duroplast Submersible Pump is ideal for water supply from bore wells, irrigation, domestic drinking water, as well as civil and industrial applications.

Duroplast Gas Stove

Feature

- Save up to 30% Gas • Auto ignition more than 50,000 times • Heavy gauge stainless steel body/Tempered Glass
- Never heat stove's body • 100% fire back free
- Durable & strong body • LPG/NG/Bio Gas supported
- Easy installation & maintaining system • Extra space for cooking • Highest load capacity gas stove in our country
- Equal blue flame pressure/supply due to finest vintage system burner • Elegant and attractive looks.

Duroplast Induction and Infrared Cooker

An induction cooker uses electromagnetic fields to directly heat magnetic cookware, offering fast, energy-efficient, and precise cooking with instant temperature control and improved safety (no open flame, less residual heat). Key features include flat glass surfaces for easy cleaning, digital controls, and the requirement for specific magnetic cookware (cast iron, stainless steel), making them popular for homes, dorms, and professional kitchens seeking modern, clean, and powerful cooking.

Duroplast Kitchen Sink

Duroplast Kitchen Sink is known for its durability, advanced technology and modern design. With a wide variety of bowl configurations available in Duroplast, Super, Deluxe and Premium series (single and double bowl combinations). We ensure that every kitchen can find the perfect match. Built with heavy gauge stainless steel, our sinks are designed to be strong, long-lasting, and rust-resistant.

Duroplast uPVC Solvent Cement

Feature

- For all classes of uPVC Pipes & uPVC Fittings
- Applicable for all grades of uPVC filter pipes
- Suitable for uPVC doors & frames
- Works on various types of uPVC sheets
- Effective for PVC floor mats & rexin etc.
- Available in 100ml, 200ml, and 500ml

Duroplast Teflon Tape

Duroplast Teflon Tape is used to connect water and gas pipes, steel, aluminum, fiberglass, etc. Which is thicker, the right size and very strong. Duroplast, Super and Premium 3 types of Teflon Tape are marketed as per the customer's demand.

Feature

- Made of 100% PTFE raw materials
- High longitudinal Strength
- Easy to use & installation

Duroplast HDPE Conduit Pipe

Duroplast HDPE conduit pipe is a durable, flexible plastic pipe used primarily to protect and route electrical power, telecommunications, and fiber optic cables, especially underground, due to its resistance to chemicals, impact, moisture, and corrosion, offering easier installation and cost-effectiveness compared to traditional materials like clay or concrete. These pipes come in various sizes, can be smooth or ribbed, and are available with pre-installed pull tape, making them ideal for modern utility infrastructure.

Duroplast uPVC Conduit Pipe

Duroplast uPVC Conduit Pipe (Unplasticized Polyvinyl Chloride conduit) is a strong, lightweight and durable plastic pipe, which is mainly used to safely carry and protect electrical wiring. Main Uses Indoor electrical wiring (concealed & surface wiring) Office, factory, building, Underground cable protection, Fire-safe wiring system.

Main Features are - Fire-resistant, Electrical insulation, Waterproof, Corrosion-free, High strength, Long lifespan.

Duroplast Electric Conduit Pipe

Feature

- Made of 100% raw materials in auto machine
- Used safely to protect electrical cables in buildings
- Flexible and does not break easily
- Available in sizes from 1/2 inch to 3/4 inch and up to 1 inch
- Available in **White and Grey** colours

Duroplast Garden Hose Pipe & Coil Pipes

Duroplast Garden Hose Pipe is a flexible tube used to convey water and used to concentrate water at one point or spread it over a large area. Duroplast Garden Hose Pipe are specially made for Gardening & Construction building Industries where low pressure work is required. To clean Cattle shed and other domestic uses. Duroplast HDPE Coil Pipes made by latest manufacturing technology. These pipes are regarded by many Engineers, Contractors & Agencies as product of choice for their requirements.

Duroplast uPVC Plumbing Pipe

Feature

- Leak-proof joints (Fitted with solvent cement for Strong)
- 100% Leak-proof connections
- Corrosion resistant, Chemical resistant, UV stabilized, durable a long-lasting
- Light weight & easy to install
- High strength & pressure bearing
- ECO-friendly

Duroplast Magic Pipe

Duroplast Magic Pipe is very flexible. It can withstand both hot (up to 80 degree) & cold water. Duroplast Magic Pipes are available in the market from 1.25 inches & 1.5 inches.

Feature

- Higher longevity • Standard quality • Easy to install
- User friendly

Duroplast CPVC Pipe & Fittings

Duroplast CPVC pipes and fittings are widely used for hot and cold water plumbing systems due to their excellent strength, durability, and heat resistance.

Feature

- Suitable for hot & cold water (up to -93°C)
- Corrosion, rust, and chemical resistant
- Smooth inner surface ensures better water flow
- Lightweight, easy to cut, joint, and install

Duroplast SWR (ISO) Pipe

Feature

- Long-lasting
- Low Friction loss, Suitable Joint
- Better Flow properties
- Low Thermal Conductive
- Internal Corrosion Resistance
- Strong and Durable

Duroplast uPVC Fittings

Duroplast Fittings products are Plain Bend (BS) Plain Tee (BS), Plain 90° Bend, Plain Tee, Y-Tee, Cross Tee, Back Door Tee, Right Door Tee, Left Door Tee, Cross Door Tee, Side Door Bend, Vent Cowl, Socket, Pipe Clamp/Clip, Bend 45°, U-Body, P-Body, Reducing Tee, R-Tee, Reducing Socket, End Cap Body, Cap small & big & All kinds of Plug. MG uPVC Fittings are available in the market front 32mm to 250 mm.

Duroplast HDPE Coil Pipe

Duroplast HDPE Coil Pipe** is a lightweight, flexible and highly durable piping solution made from high-density polyethylene. **Supplied in 300 ft to 500 ft coils**, which makes transportation and installation easy, especially in difficult terrain.

Available Size : 1/2 Inch to 2 inch

Feature

- Water supply • Irrigation systems • Gas distribution
- Sewer and drainage systems • Geothermal heating systems
- Cable and telecom ducts • Underground utilities

Duroplast Class Pipe

Duroplast uPVC Class Pipe and Fittings are specially made for boring (water lines of Tube-well, Shallow & Deep boring, Irrigational, City water supply and Industrial process lines) purposes as per BS Standard specifications. These pipes have the capacity to endure high pressure. Duroplast pipes can withstand the pressure at 1000 feet under the ground to draw out water. There is no substitute for Duroplast Class Pipe for the protection and performance you deserve. Duroplast Class Pipes are available in the market from 1.5 Inches to 18 Inches.

Duroplast uPVC Filter

Duroplast uPVC filter is a filter or pipe that has small holes (slots) inside it. When water enters through these holes, sand, mud, stones or dirt get stuck and clean water comes out.
